Speculators Suspicious That Money Will Go Higher Over the Ocean.

MORE CASH LOST BY BANKS

BAD EFFECT OF PENNSYLVANIA RAILROAD STOCK ISSUE.

New York, Nov. 6.-Misgivings over the money outlook were as much responsible in banks to credit of treasurer much on the actual tone of the money market as on the suspicion of the active measures necessary on the part of the capitalists to conserve such ease in money rates as has been secured thus far.

There has been an actual hardening of money rates on time loans in the latter part of the week and a resumption of active demand for loans for the shorter periods. The extensive shifting of credits from one quarter to another, either in this country or to foreign money markets, has relaxed the situation more than once when it tended to become stringent. A 6 per cent minimum discount rate both by the Bank of England and by the Imperial Bank of Germany caused renewed discussion. The result of such a rate would probably be the dislodgement of credits on which the New York market is relying to carry through the fall with ease

fall with ease The further pressure on Pennsylvania The further pressure on Pennsylvania today in connection with the offering of new stock at par was a factor in keeping alive an uneasy feeling over money market resources. More consideration was given today to the week's loss in cash by the banks indicated by yesterday's preliminary estimates. There were premonitions also that the loan item of the forthcoming bank statement would show the effect of the large receipts of home coming securities from foreign markets. ing securities from foreign markets. Large withdrawals of gold from the Bank of England for shipment to Egypt em-phasized the impression of the hardenphasized the impression of the harden-ing of the world's money markets. Stocks had a substantial recovery on short cov-ering, induced by denials of positive re-ports that an advance in the German bank rate on Monday had been deter-mined on. The bank statement showed over \$6,000,000 actual loss of cash and the loan expansion served to swell the deloan expansion served to swell the de-posit liabilities as well. The surplus is reduced \$8,878,850 by the average of \$5,-

Bonds were irregular. Total sales, par United States 2s have declined ½ and the 3s common and the 4s registered ¼ per cent on call during the week.

The Bank Statement.

New York, Nov. 6.—The statement of clearing house banks for the week (five days), shows that the banks hold \$5,042,575 more than the requirements of the 25 per cent reserve rule. This is a decrease of \$8,867,250 in the proportionate cash reserve as compared with last week. The state ment follows:

Loans, \$1,246,974,000; increase, \$13,009,500. Deposits, \$1,241,490,500; increase, \$7,446,200. Circulation, \$53,278,800; increase, \$112,500. Legan telders, \$68,530400; decrease, \$2,523,-

Specie, \$246,877,300; decrease, \$4,482,200. Reserve, \$315,407,700; decrease, \$7,005,700. Reserve required, \$310,365,125; increase, Surplus, \$5,042,575; decrease, \$8,867,250. Ex. United States deposits, \$5,449,325; derease, \$8,878,850.

The percentage of actual reserve of the learing house banks today was 25.48. clearing house banks today was 25.48.

The statement of banks and trust companies of Greater New York not reporting to the clearing house shows that these institutions have aggregate deposits of \$1,272.045,600. Total cash on hand, \$146.817.-600, and loans amounting to \$1,200,810,900.

The Financier will say: The most striking feature in connection with the statement of the associated banks of New York City for the week ending Nov. 6 was a loss of \$6,085,500 in cash, due for the greater part to operations with the sub-treasury, and an increase of \$6,524,000 in loans. A heavy expansion in loans had been anticipated and the amount was smaller in fact than preliminary estimates smaller in fact than preliminary estimates had foreshadowed.

had foreshadowed.

Deposits, as a result of the changes just noted, showed a moderate expansion of \$2,071,100. The reserve on all deposits tell \$6,603,275, leaving the present surplus above the 25 per cent legal requirements \$4,496,325. The cash reserve, figured on the actual showing of the banks Satur-

the actual showing of the banks Saturday, was 24.8 per cent.

There had been reason to believe that some of the loan commitments had been shifted to the trust companies, but the statement of these institutions and the state banks showed an actual decrease of \$4,671,700 in loans, and a loss of about \$2,750,000 in cash, and a decrease of \$7,500,000 in net deposits.

As showing the liquidation which has

As showing the liquidation which has occurred in one year, it may be stated that, compared with the exhibit made one year ago last week, the clearing house banks have decreased their loans 74,000,000, their deposits \$155,000,000 and their cash holdings about \$65,000,000. If the next two weeks reveal, as is predictional forms of the compared with 1,149,000 bushels, compared with 1,149,000 bushels the corresponding oats, 154 cars; hogs, 32,000 head.

Butter, Cheese and Eggs.

New York, Nov. 6.—Butter—Firm, unchanged. ed, the transfer of larger amounts of American securities from England, the burden on the New York banks will be increased, but rates for money do not indicate much apprehension on that score

Development of Promising East Tintic Ground to Be Resumed.

Active development of the property of the Tintic Combination Mining company the Tintic Combination Mining company sist to be resumed at once, according to B. H. Bullock, the company's general manager, who was in the city yesterday pre-

paring for the work.

When at work early in the year the company sank to the depth of 204 feet a shaft of two compartments and manway. shaft of two compartments and manway. The shaft is well timbered and in perfect condition. In sinking it were encountered bodies of highly mineralized quartz similar to the quartz which in the Sioux Consolidated company's mine was found next to the ore. Several stringers of copper-silver sulphides gave further evidence that the shaft is in an ere country. East of the shaft, near the apex of the mountain, is a vein seventy-five feet wide. nountain, is a vein seventy-five feet wide, from which years ago was taken considerable rich silver ore. It is the purpose of the company to put the shaft down to about 250 feet depth, then drift over to the big vein, which will be encountered at the depth of nearly 500 feet from the surface.

That vein is one of three well-defined edges which extend the distance of 4,000 eet through the property, from north to outh. Lying just east of Tintic Central south. Lying just east of Tintic Central and Iron Biossom, the group is on the same great mineralized zone as that which further north is being explored by Tintic Standard, East Tintic Development, Iron King and others. Leading mining men who have examined the Combination property agree that in the ground should be opened one of the big mines of Tintic.

The company has on the ground a large

The company has on the ground a large whim house, blacksmith shop and timber house. A buffalo whim was used to sink the shaft to its present depth, but now a modern steam plant is to be installed, with the intention of pushing the

Cole-Ryan Railroad Survey to Water Supply Arouses Interest.

The Federal Ely Copper company.

The Federal Ely Copper company, with a force of twelve and fifteen men employed, is resuming active development work in both of its groups of claims in the Ely district. A new hoist is to be placed on the Pride of the West shaft. W. J. Craig, general manager of the company, is due to leave today for the east; mission unknown.

Curiosity as to just what is going on in Federal Ely local interests in the company decline to satisfy. That a deal for control is pending is generally believed. In view of the Cole-Ryan interests naving announced their intention of Chicago, Nov. 6.—Butter—Steady; cream-irles, 26@30½; dairies, 24@28. Eggs—Receipts, 5,414 cases; strong, at nark, cases included, 20½@25½; firsts, 27; uilding a new concentrator and smelter to treat their Ely ores, and in view of the further facts that Federal Ely owns he only available important water supply near the Ely district, and that the heese—Firm; daisies, 16@16¼; twins. @16; young Americas, 16@16¼; long Giroux company has had made a preliminary survey for a line of railroad wenty-seven miles long, extending from its mines to a point near the water supply of the Federal Ely companymany persons assume to be "wise cerning what is going on in Federal Ely.

Flatulence Prevented But, of course, it's all a guess. Federal Ely's properties are both close to the heart of the district, within rea-sonable proximity to Nevada Consoli-dated and Cumberland Ely, and in both In the Stomach by Charcoal, the porphyry and limestone formations. In its Steel group is a tunnel 900 feet long, which is well along toward getting un-Some years ago Dr. Belloc, a retired der an outcrop of mineral where a great surgeon of the French army, turned his body of commercial ore is virtually asattention to charcoal as a remedy for sured. The mouth of the tunnel is with dyspepsia, fermentation and flatulence, in a few feet of the Nevada Northern or gas in the stomach and intestines. He railroad, permitting of mine cars being was himself a sufferer from these sympdumped directly into railroad cars. In the Queen of the West group a shaft to toms, and thus had an opportunity of the depth of 109 feet is in sulphide ore of testing personally its therapeutic action.

#### commercial grade. Water Rights Are Valuable.

coal made of willow wood was by far the best. He found that charcoal made of other woods caused a disagreeable taste in the mouth—even painful excoriations of the mucous membrane, as well as thirst, and a pinching sensation in the stomach; but not one of these symptoms ever occurred when willow charcoal was employed. But the Federal Ely company made it: eally masterstroke when it acquired Steptoe valley ranch which carries with t one of the few important water right: in that region-the others having been acquired by the Guggenheims. The wa-Was employed.

He was in the habit of prescribing from two to six teaspoonfuls for his patients, but he himself frequently took as much as 500 grammes, or more than fifteen ounces per day. There is really no such thing as taking too much charcoal. An excess cannot be taken, for the reason that the more you take the better it is for you, as it is entirely harmless, and through its use your system will be completely cleansed of all its impurities, the fermentation of food and the formation of gas in the stomach prevented and the ter supply thus controlled is ample, t is said, for a large smelter and concen trator. Conservative experts, having it mind the assured great ore production of the Ely mines, have averred that the Federal Ely water rights are worth the entire \$1,000,000 capitalization of the company.

Possibly the Cole-Ryan interests wil consider themselves fortunate to be abl to purchase the water rights for a half of gas in the stomach prevented and the absorption of toxic products or poisonous material into the blood from the stomach and intestines estopped.

When a regular physician took as much as fifteen ounces of charcoal daily, its harmlessness and beneficial effects as an absorbant descriptor. million, with the mining properties

### UTAH FUEL TO DRIVE LONG WATER TUNNEL

absorbent, deedorant, germ destroyer and dyspepsia cure should be apparent to all. The Academie Nationale de Medicine of The Utah Fuel company is taking contracts for the driving of a tunnel 8,000 feet long from Range creek to its mines at Sunnyside. The estimated cost of the Paris reported very favorably on a mem-oir which Dr. Belloc published on the use oir which Dr. Belloc published on the use of charcoal, and in France it soon became a favorite remedy. Its reputation spread to this country and now we find charcoal lozenges extensively sold, prescribed and employed as dyspepsia remedies. Dr. Belloc's charcoal was administered to his patients in the form of a powder stirred up in water, which was very disagreeable to the taste, and its efficacy was far less than in the form of a lozenge. tunnel is from \$8 to \$10 a foot. It will carry through the mountain the water supply for the company's coal mines. The water supply is at present obtained by pumping from Range creek.

### TINTIC STANDARD HAS ALL QUARTZ IN SHAFT

efficacy was far less than in the form of a lozenge.

Stuart's Charcoal Lozenges are a great and happy improvement upon this form of administering charcoal. They are made of the best willow charcoal, freshly prepared, and rendered exceedingly palatable by the addition of pure honey, which gives them a taste that is in strong contrast to that of ordinary powdered charcoal. Nothing could be more efficacious in its effects than charcoal given in this desirable form. Two or three of Stuart's Charcoal Lozenges taken after meals are sufficient to give complete relief. Go to your druggist and buy a box, but insist on having Stuart's, as there are many worthless imitations on the market, not made of willow wood, but of poplar, boxwood, dogwood, etc., which are not good for the system. For sale everywhere, 25 cents per box. Sample box will be sent free by mail upon request. Address F.

A. Stuart Co., 200 Stuart Bidg., Marshall, Mich. At the depth of 654 feet the bettom of the shaft of the Tintic Standard Mining company was entirely in reliow quartz, with considerable iron stain. Strata of the quartz began to come into the shaft several days ago, and now the lime is entirely replaced by it. It is the material which encases ore bodies in Tintic district—evidence that the shaft is in the edge of an ore body could hardly be more conclusive before entering the ore itself.

### NEVADA CON. MAKES NEW RECORD OUTPUT

Ely, Nev., Nov. 6.-Reports of operations of the Nevada Consolidated during October show that the gross output of ore produced by that company during the month was 208,000 tons, a daily output of 6,700 tons. This ore passed through the concentrator of the Steptoe Valley Smelting & Mining company at McGill-establishing a new high record for both the mine and the concentrator. All of this ore was produced from the pit and averaged 2 per cent, as com-pared with 3½ per cent from the Ruth. The cost of production has been reduced to 6.5 a pound, which is the lowest production cost yet reached. With copper at 12 cents, a net profit of 5.5 is made at this production cost.

The Nevada Consolidated has completed the drill hole on the east side of the steam shovel pit between the Eure-ka shaft and the pit. A depth of 335 feet was reached, proving ore for a

depth of 170 feet. At ninety feet the hole struck water; at 140 feet it passed through rhyolite; and at 165 feet it went into the copper ore, remaining in ore

#### HOMBER MINE STARTS **GRAPHITE PRODUCTION**

The Homber Mining company, operating near Brigham City, is loading for chipment its first carload of graphite to shipment its first carload of graphite to be marketed. It is to be ground in a mill in this city. A portion of the product has been spoken for by a local foundry, to be used for facing castings; the remainder will go to the paint works. It is a morphus graphite of exceptionally high quality, tests showing it to be from 90 to 98.3 pure. T. J. Yates, the company's general manager, believes that no difficulty will be experienced in finding a ready market for the entire output of the mine, which, when arrangements for production are complete, will be large.
